*In this table, Hard-to-Count Census Tracts are those in the bottom 20 percent of 2010 Census Mail Return Rates (i.e. Mail Return Rates of 73 percent or less).

TABLE 2b: 100 Largest Cities Ranked by <u>Percent</u> of Children Under Age 5 Living in Hard-to-Count (HTC) Tracts

Some census tracts straddle city boundaries. If the majority of the population in such tracts is inside the city, the total population for the census tract is considered to be inside the city.

CDPs are Census Designated Places. These are places delineated to provide data for settled concentrations of population that are identifiable by name but are not legally incorporated under the laws of the state in which they are located. Place names that include the word "balance" mean the data are for the place minus data for any incorporated place located within the boundaries of the place.

Source: Population totals in this table are from U.S. Census Bureau's 2011-2015 American Community Survey.
