Bush's 2006 budget: a disgrace to all conservatives

There is much room for criticism of the budget that President George W. Bush, DC '68, recently proposed for fiscal year 2006. Given the public's distrust of the politicians in Congress, it is safe to say that the budget has been met with mixed reviews. A good number of people believe that the budget does not address the most pressing problems facing our country. However, a significant number of people feel that the budget is a step in the right direction. Some believe that the budget is too conservative, while others believe that it is too aggressive.

Many people are concerned about the budget's impact on the economy. They believe that the budget will lead to an increase in the national debt. Others believe that the budget will lead to a decrease in government spending. Still others believe that the budget will lead to a decrease in the country's ability to respond to emergencies.

In conclusion, the budget is a complex document that requires a careful review. It is important to remember that the budget is a tool used by the government to manage the country's finances. It is important to evaluate the budget carefully and to consider its impact on the country's economy and society.
