

April 7, 2022

United States Senate  
Washington, DC 20510

Dear Senator,

On behalf of The Leadership Conference on Civil and Human Rights, a coalition of more than 230 national organizations committed to promoting and protecting the civil and human rights of all persons in the United States, we write to encourage your support of the Biden administration's plans to end Title 42 on May 23, 2022, in accordance with a robust analysis<sup>1</sup> conducted by the Centers for Disease Control and Prevention (CDC). We strongly urge you to reject any congressional efforts to keep this wholesale policy failure in place. We ask that you allow the Biden administration to restore meaningful access to asylum at our Southern border and welcome asylum seekers and refugees with dignity.

**Title 42 is not, and has never been, a public health policy.** For two years, Title 42 has failed to protect public health or stem the tide of COVID-19 in the United States. Epidemiologists,<sup>2</sup> former CDC officials,<sup>3</sup> and public health experts<sup>4</sup> have denounced the junk science<sup>5</sup> behind the use of Title 42 since it was enacted. Title 42 has also reinforced ugly, racialized stereotypes about immigrants and disease, and recent characterizations of Title 42 as a border management tool belie any reasoning based on science or public health and confirm that it has indeed been used as an immigration policy, not a public health policy. Title 42's prolonged use over the past two years is a stain on the Biden administration's still-unfolding legacy. **Title 42 has exposed asylum seekers to chaos and violence.** Title 42 has not deterred asylum seekers and refugees from traveling to the border — it has, in fact, increased<sup>6</sup> the number of desperate people seeking protection. Many of those who are expelled quickly attempt re-entry when their asylum claims are not heard. Neither Title 42, nor any other dubious policy of its kind, can deter people who seek protection from persecution. Title 42 has exposed asylum seekers to violence after expulsion — with

almost 10,000 reports<sup>7</sup> of kidnapping, rape, assault, torture, and more. Furthermore, Title 42 has had an outsized negative impact on Black asylum seekers<sup>8</sup> in particular, including mass deportations and gruesome violence against Haitian migrants by Customs and Border Protection officials. We decried<sup>9</sup> this violence against Haitian and other Black asylum seekers last September, and we do so again today.

**The Biden administration has a plan to address safety and due process at the border.** The removal of Title 42 is a return to regular order: Asylum claims will once again be processed and heard. We trust that the Biden administration and the Department of Homeland Security's comprehensive, whole-of-government plan<sup>10</sup> for potential increases in migrants seeking shelter will be executed in good faith. We urge all members of Congress to reject efforts to politicize COVID-related emergency public health designations by tying them to Title 42's use as an immigration policy, which would put health-related programs and funding in dire jeopardy. Ending Title 42 is an urgent racial justice, human rights, and civil rights issue, and we encourage you to work with the Biden administration to finally change course.
